

# K6U – Classic “Klones”

10,000 lbs. (4,536 kg) capacity

## RAM K6 Series Air Winches

Like all the RAM “Klone” series of air winches, the K6 is more rugged, tough and dependable than the original models introduced into the oil field back in 1957.

Built from low-temperature materials and fully capable of meeting current ABS, DNV or LRS, Third Party certification requirements, the RAM K6 series air winches can handle any 5 ton capacity Drill Floor or Moonpool application found on today’s modern Barge, Jack Up & Floating Rigs anywhere in the world.

Easy to work on and less expensive to maintain, the RAM K6 air winch uses 35 to 40% less air consumption to provide the same line pull and line speeds as any Generation of air winch currently found on the market.

*Available in standard utility and dual rated, utility / personnel models.*
